

Energy Tax Credits - Just in Time for Winter!

As the weather gets colder, now is the time to take advantage of the energy incentives provided in the American Recovery and Reinvestment Act (ARRA).

A recent IRS news release, [IR 2009-98](#), provides details on two home energy tax credits: the non-business energy property credit and the residential energy efficient property credit. These credits will help homeowners cut their winter heating bills and lower their 2009 tax bill as well.

ARRA expanded many other energy incentives and also created several new energy credits for both [individuals](#) and [businesses](#). More information on all the provisions of ARRA can be found on the IRS [Tax Provisions in the American Recovery and Reinvestment Act of 2009](#) webpage.
