Rocket Science 2019 - A perennial favorite returns!

Build and launch our favorite solid fuel rocket, the customizable E2X: perfect for the young aerospace engineer. Keep a Commander's Log as you investigate the solar system, design a satellite, and build a space base for an astronaut.

Blast off with a solid fuel highflying rocket launch at the end of the week (weather permitting). Make it a full day! Continue with the flight plan and launch water rockets, make galactic slime, and map distant constellations as part of your out-of-this-world lunar journey. **(Minimum 8)**
